

Editorial to the tenth issue of International Journal of Geoscience, Engineering and Technology

With great honor, we present the tenth edition of the International Journal of Geosciences, Engineering and Technology.

The mission of this journal is to showcase initiatives and ideas, with an effort focused on structuring and consolidating scientific thinking in the areas of Geosciences, Engineering and Technology.

The International Journal of Geosciences, Engineering and Technology is an interdisciplinary journal of the Graduate Program in Technology, Environment and Society of the Federal University of Vales do Jequitinhonha and Mucuri (PPGTAS/UFVJM).

Only through scientific investigations will societies achieve development, and will become increasingly developed for the well-being of society.

The articles in this edition contribute to advances in multidisciplinary characteristics in different areas of science and technology.
