

Editorial to the eleventh issue of the International Journal of Geoscience, Engineering and Technology

We present the eleventh edition of the International Journal of Geosciences, Engineering and Technology, whose selected articles contribute to advances in the multidisciplinary characteristics of research areas in science and technology.

The International Journal of Geosciences, Engineering and Technology is an interdisciplinary journal of the Graduate Program in Technology, Environment and Society of the Federal University of Vales do Jequitinhonha and Mucuri (PPGTAS/UFVJM).

Science is a universal subject that encompasses the branch of knowledge that examines the structure and behavior of the world around us through observation and research.

Advances in education are strengthened by research and must be integral to the academic world.

This journal's mission is to showcase initiatives and ideas, with an effort focused on structuring and consolidating scientific thinking in the areas of Geosciences, Engineering and Technology.

All advances in knowledge include the dissemination of research and the publication of articles with all their respective results.
